

ImageNow 7.1.5 Upgrade

ImageNow Client Installation - Upgrade

ImageNow 7.1.5 Client Installation - Upgrade

Download the client installation file at the following link:

<https://drive.google.com/drive/folders/0B4VHox2mpK51QzV6bFdncmRNNTQ>

- Make sure to save the client installer to an easily accessible location
- The installer file can be deleted once the upgrade/installation is complete

Launch the client installer:

- For Windows Vista, 7, and 8: Right-click on the file downloaded in the previous step and select "Run as administrator"
- For Windows XP: Double-click on the file downloaded in the previous step

If an *Open File - Security Warning* window appears, click on *Run*

ImageNow 7.1.5 Client Installation - Upgrade

Select your installation language and click *OK*:

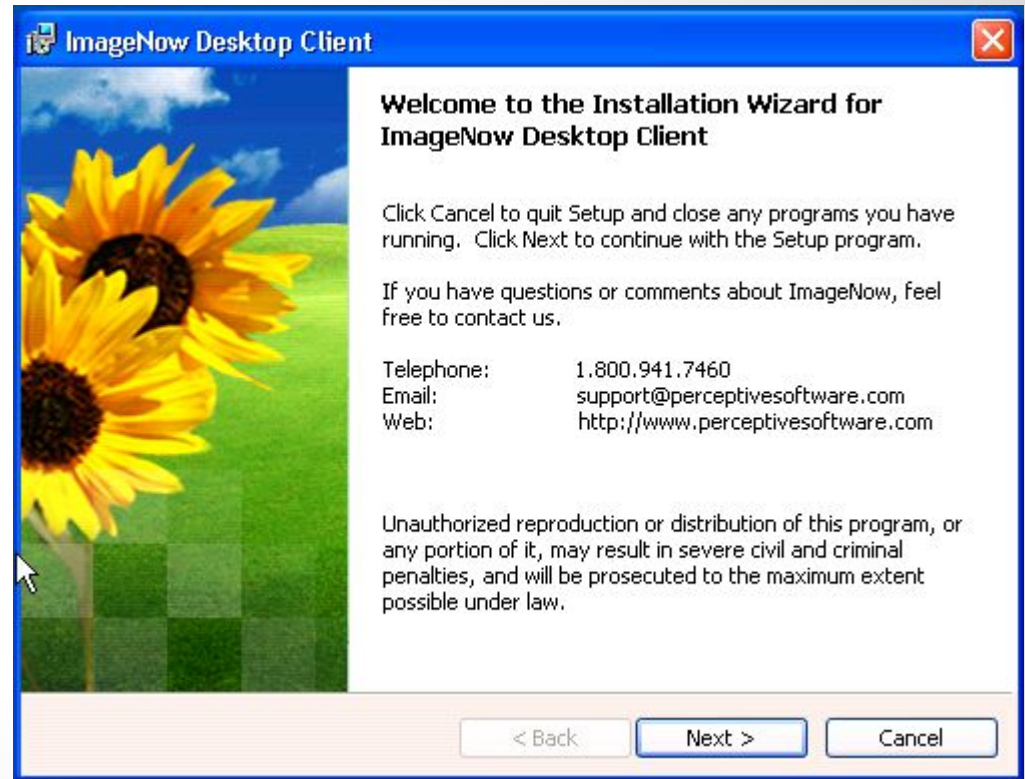

Click *Yes* on the upgrade notice:

On the Custom Setup page:

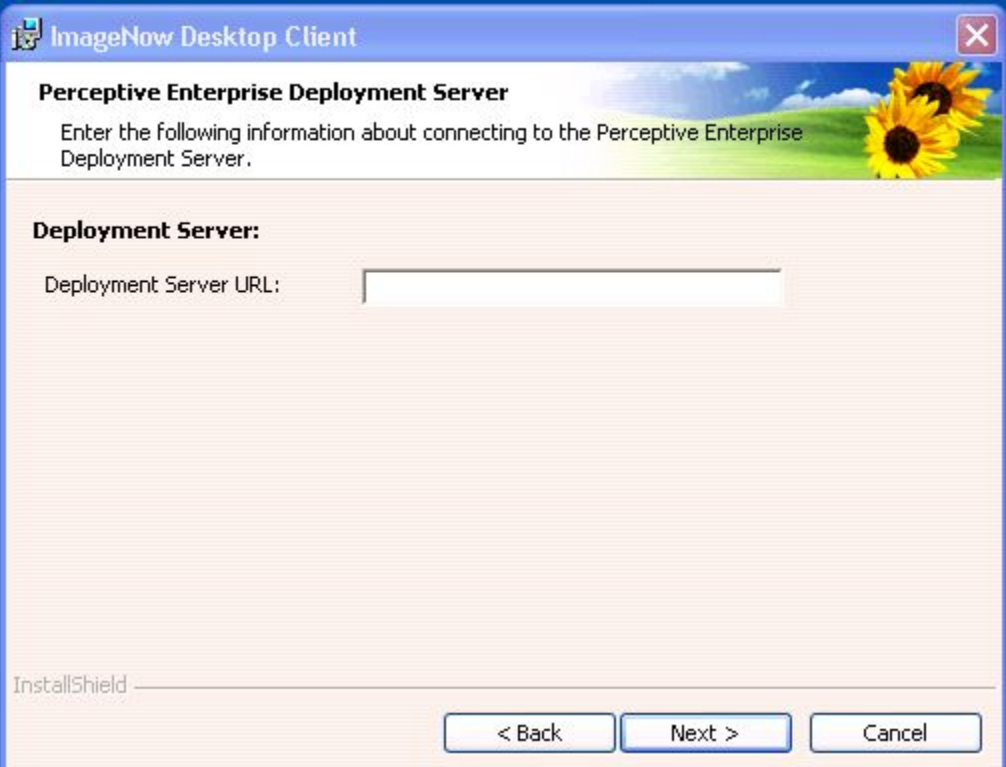

- Make sure that all components are set to be installed using the dropdown options
- No "red Xs" should be showing to the left of any of the components, including Business Insight Integration
- Click on *Next*

ImageNow 7.1.5 Client Installation - Upgrade

On the Perceptive Enterprise Deployment Server page:

- Leave the Deployment Server URL blank
- Click on *Next*

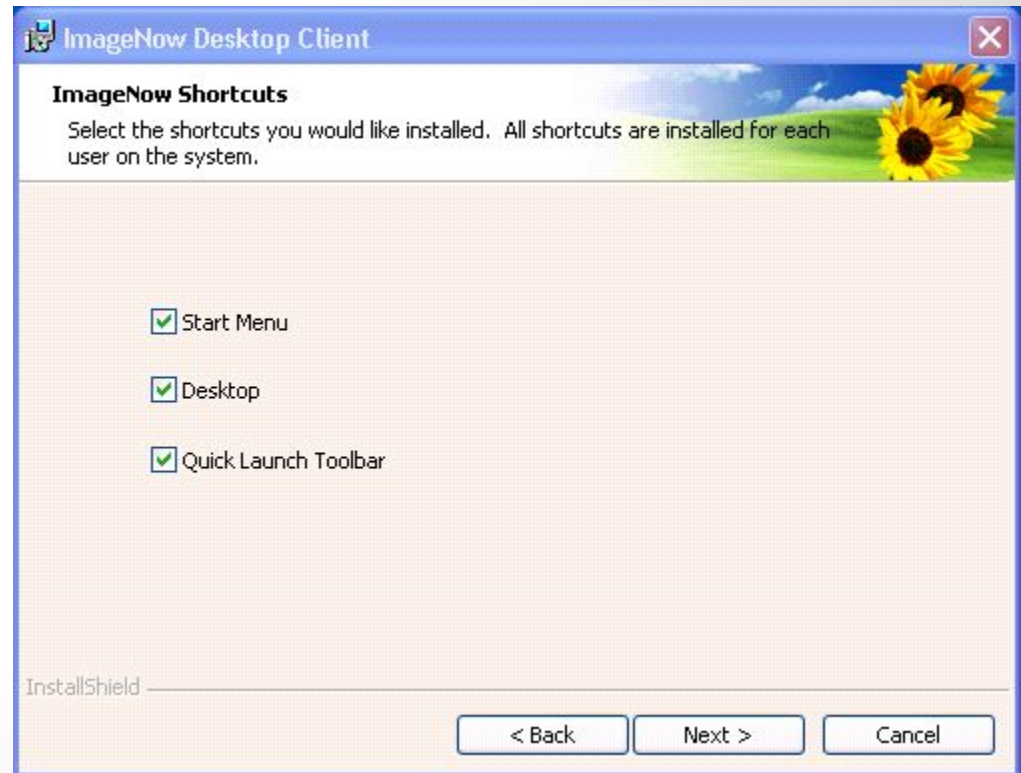

The screenshot shows a Windows-style dialog box titled "ImageNow Desktop Client". The main heading is "Perceptive Enterprise Deployment Server". Below the heading, there is a decorative banner with a blue sky, green grass, and yellow sunflowers. The text below the banner reads: "Enter the following information about connecting to the Perceptive Enterprise Deployment Server." Underneath, there is a section titled "Deployment Server:" with a label "Deployment Server URL:" followed by an empty text input field. At the bottom of the dialog, there are three buttons: "< Back", "Next >", and "Cancel". The "InstallShield" logo is visible in the bottom left corner.
